

FitBuddy

Project Demonstration

Step-by-step walkthrough with screenshots

Overview

This document demonstrates how a user works with FitBuddy from start to finish: entering personal details, receiving a personalized 7-day workout plan with a nutrition or recovery tip, and refining that plan by giving feedback. Each step below shows a screenshot followed by an explanation.

Flow of the demonstration

- Step 1: Enter Your Details (Home Page)
- Step 2: Personalized Plan Is Displayed
- Step 3: Review the Plan and Refine It (Feedback Box)
- Step 4: Rest of the Week and the Update Plan Button
- Step 5: Updated Plan Based on Feedback

Technology: HTML, CSS, JavaScript (frontend), Python (backend), MySQL (database).

Step 1: Enter Your Details (Home Page)

The screenshot shows the FitBuddy web application in a browser. The browser's address bar displays the URL 127.0.0.1:8000. The page has a dark theme. On the left, the text "AI FITNESS PLANNER" is in small green letters, followed by the large white heading "Your weekly wellness plan, built around you." Below this, a small paragraph reads: "Enter a few details and FitBuddy creates a structured 7-day plan plus a practical nutrition or recovery tip." On the right, there is a form with the following fields: "Name" (text input with "lekha"), "User ID" (text input with "u456"), "Age" (text input with "19"), "Weight (kg)" (text input with "45.5"), "Fitness goal" (dropdown menu with "Muscle gain" selected), and "Intensity" (dropdown menu with "Medium" selected). Below these fields is a small disclaimer: "For users under 18, FitBuddy focuses on general wellness and does not provide weight-loss or body-composition coaching." At the bottom of the form is a large green button labeled "Generating..." in black text. In the top right corner of the application, there is a link labeled "API Docs".

Figure 1: FitBuddy home page with the user details form

- The user opens FitBuddy in the browser (running locally at 127.0.0.1:8000). The home page shows the heading "Your weekly wellness plan, built around you."
- The user fills in the form: **Name** (lekha), **User ID** (u456), **Age** (19), **Weight** (45.5 kg), **Fitness goal** (Muscle gain), and **Intensity** (Medium).
- A safety note explains that for users under 18, FitBuddy focuses on general wellness and does not give weight-loss or body-composition coaching.
- Clicking the green button submits the details. While the plan is being created, the button changes to **Generating...**

Step 2: Personalized Plan Is Displayed

Figure 2: Personalized plan page with the 7-day workout plan and nutrition tip

- After submission, FitBuddy greets the user by name (**Hi, lekha**) and shows tags summarising the inputs: Muscle Gain, Medium intensity, Age 19.
- The **7-Day Workout Plan** card lists each day with its focus, warm-up, main exercises with sets and reps, and cooldown. Day 1, for example, is a full-body session with bodyweight squats, wall push-ups, and bird-dog.
- The **Nutrition / Recovery Tip** card on the right gives practical advice: balanced meals, hydration, protein-containing foods, fruits and vegetables, and adequate recovery.
- The notice "Demo mode is active" means the Gemini API key is not configured, so the app is producing built-in demo plans. Adding a GEMINI_API_KEY enables AI-generated plans.

Step 3: Review the Plan and Refine It (Feedback Box)

Figure 3: Plan (Days 1 to 4) with the "Refine your plan" box filled in by the user

- Scrolling down shows the plan day by day: Day 1 Full body, Day 2 Cardio, Day 3 Lower body + core, Day 4 Recovery.
- Below the nutrition tip is the **Refine your plan** section. It invites the user to tell FitBuddy what to change, such as more recovery or more flexibility.
- In this demonstration the user typed: *"add more flexibility exercises , include enough recovery days and keep the friendly workouts."*

Step 4: Rest of the Week and the Update Plan Button

Figure 4: Days 3 to 7 of the plan and the Update Plan button

- Further down, the remaining days are shown: Day 5 Upper body + posture, Day 6 Enjoyable movement, and Day 7 Rest + reflection, each with warm-up, main work, and cooldown.
- The feedback text the user entered stays visible in the box, and the green **Update Plan** button sends it back to FitBuddy to regenerate the plan.

Step 5: Updated Plan Based on Feedback

Figure 5: Plan page after clicking Update Plan

- After clicking Update Plan, the page reloads with a confirmation banner: **"Your plan was updated from your feedback."**
- The user's details and tags remain the same, and the 7-day workout plan and nutrition tip are shown again, now reflecting the refinement request.
- The user can repeat the refine step as many times as needed until the plan suits them.

Summary

FitBuddy lets a user go from entering basic details to a personalized 7-day plan in one step, and then adjust that plan with plain-language feedback. This makes the app simple to use while keeping the plan tailored to the user's goal, intensity, and needs.
